**1. Name and Description of Company/Organization:**

NSK Corporation

NSK became one of the leaders in the bearing industry because of intense commitment to engineering research, dedication to modern manufacturing and an obsession with quality.

For 100 years, NSK has been an industry-leading pioneer since becoming Japan's first bearing manufacturer in 1916. Since then, NSK has expanded its product line to include bearings, electric power steering columns, and linear guides. At NSK, we believe that how we do it is just as important as what we do. We are always taking steps to maintain our industry lead that includes continuous improvement in our products, quality, information, and services.

NSK is always on the lookout for bright, ambitious team players who have the desire to succeed. Our employees not only strive to make improvements to our products but also our community, the environment, as well as themselves. NSK takes pride in personal development and encouraging our employees to be the best they can be. If you are looking for a great career with a company that will encourage you to work, learn, and grow, NSK encourages you to apply to our open positions.
